

Sam's thoughts about the Covid-19 pandemic as gleaned from publicized information.

- Covid-19 mainly kills people with co-morbidities or old age, or deficient vitamin D3.
- Thousands of people in nursing homes have been intentionally infected by government mandates housing known infected people with the homes' general populations. Pure evil. Follow the money for motivation.
- Healthy people have a better than 99% survival rate, and the younger someone is the better it gets.
- Ivermectin and HCQ have been shown to be effective as treatments. Both have been suppressed by governments to permit emergency use of unproven treatments that do not qualify as true vaccines.
- The covid survival rate for healthy people is almost 100% when treated with HCQ and other readily available meds or Ivermectin. Their survival rates are better than a vaccine survival rate. There is no need for a vaccine.
- There is nothing "novel" about covid19. Coronaviruses have been manipulated in labs for over 20 years.
- Roughly 70 patents have been awarded for similar versions of them. Many suggest similar arrangements for the same song, some with added and others with omitted phrases. Gain of function has been studied in depth.
- Coronaviruses with added features have been considered for use as bioweapons and vaccines. I am unaware of a single successful vaccine being created. After about 20 years, Dr. Fauci has failed to produce a HIV vaccine.
- Coronaviruses were almost always found in animals until recently. Attempts to find a vaccine resulted in the death of jabbed animals due to autoimmune overreactions upon re-exposure or exposure to a similar virus.
- An excessive autoimmune response that results in death has not been ruled out for the current crop of vaccines, leaving millions of people potential victims of a bioweapon that takes advantage of this vulnerability.
- The spike protein is a recognized pathogen and is reproduced in large quantity by vaccinated people. The spike appears in the lining of blood vessels and causes platelets to form clots in capillaries. In most of the body these are naturally removed, but in the brain, spinal cord, heart, and lungs damaged vessels are never repaired. These clots cause blood pressure to rise and the heart has to work harder on a continuous basis. Some doctors have projected that in about three years there will be a massive die off of vaccinated people due to heart failure.
- There have been thousands of deaths attributed to these SO CALLED "Vaccines". There are a variety of adverse reactions, some mild, and some debilitating or deadly. These concoctions were never tested for long enough to determine their viability as a true vaccine. In fact, some of their undesirable properties and effects were well known before they received their illegitimate emergency use approval. Known treatments were available.
- There are several problems with identification of Covid and flu viruses.
 - The PCR test inventor says that it was never intended to identify a particular virus.
 - Using too many cycles of amplification in the PCR tests resulted in grossly inflated false positives.
 - Hospitals were financially incentivized by government to claim covid related deaths. They jumped on that with glee. Covid deaths were GROSSLY inflated as a result.
 - The CDC has admitted that it did not have a Covid19 virus for testing, and that they made up several different concoctions to simulate it. Tests were developed using these bogus mixtures.
 - The virus tests were unable to differentiate between flu and covid viruses. That explains why flu virtually disappeared last year.
 - HOAX - CDC now admits that being "fully vaccinated" does not actually fight the "delta variant," but instead contributes to more infections. Therefore, the unvaccinated are just as safe as the "jabbed". How 'bout dat?
- Governments and universities were the main drivers of virus research. When gain of function research was suspended in the US in 2014, Dr. Fauci surreptitiously funded that research in China via another organization.
- Although not verified, covid likely escaped from a government or university lab. Was it intentional? Who Knows?
 - Government dictator types, aided by a corrupt media, have used the pandemic as an excuse to gain power.
 - Forced/proof of vaccination schemes and condemnation of the unvaccinated creates a two tier society.
 - Lockdowns have wrecked economies world-wide, while enriching corporations at the expense of people.
 - Ineffective masking and social distancing have been used to intimidate panicked people.
 - Eliminating masks in an operating room reduced infections by 50% in 1980. This was repeatedly verified.
 - Stopping a virus with a mask is like using builders' scaffolding to stop marbles.
 - Social distancing can't work because viruses are transmitted on aerosols which float in air.
- Coordinated pandemic orchestration by governments and big pharma seems extremely likely. Big money coupled with depopulation calls and forced "vaccinations" with horrid effects lend credence to the suspicion.
- With a 99%+ survival rate, and cheap treatments vs. ineffective "vaccines" with bad side effects, it seems that the unvaccinated would be wise to remain so....and be kind to the vaxxed as they may someday need help.
